

Two opportunities to learn more about developmental screening tools!

Ages and Stages Questionnaire

The Ages & Stages Questionnaires® (ASQ) system is a low-cost, reliable way to screen young children for developmental delays during the crucial first five years of life. Parents complete the simple questionnaires at designated intervals, assessing children in their natural environments. Each questionnaire can be completed in just 10-15 minutes and covers five key developmental areas. Professionals convert parents' responses to color-coded scoring sheets, enabling them to quickly determine a child's progress in each developmental area.

Parental Evaluation of Developmental Status: *Developmental Milestones*

PEDS-Developmental Milestones (PEDS:DM) is a brand new high-quality developmental screening tool that can be used alone, with the regular PEDS (Parents' Evaluation of Developmental Status), or with other tools. In addition:

- PEDS:DM can be used to screen children birth to age 8,
- It consists of 6-8 items, depending on the age of the child, and
- Each item serves as a screen for a different developmental domain.
